

Resampling methods (with R)
ISCB Coordinator: *Jenő Reiczigel*
ISCB Invited expert: *Julia Singer*
22-24 October 2010
Faculty of Computer Science
“Al. I. Cuza” University
Iasi, Romania

Course Evaluation

	Course Content	Lectures	Documentation	Applications
No. participants	35	35	35	35
Missing (personal reasons) ^{*)}	2	2	2	2
Mean score ^{**)}	4.64	4.61	4.55	4.45

^{*)} The colleagues who were not able to attend the course received the full documentation (theory and applications).

^{**)} 5 – Excellent, 4 – Very good, 3 – Good, 2 – Satisfactory, 1 – Poor

- 28 of 33 participants asserted that their **expectations** where **met** while for 5 of them they were **exceeded**.
- 31 of 33 participants estimated that the course had a **correct length** while other 2 considered the course **too short**.
- **All the 33 participants recommended the course to be attended and expressed the will that such courses be organized more often.**

The course had the on-line option at the request of 5 participants (Serbia, Poland, Norway, Germany and Romania). The evaluations received from the on-line participants were similar with the ones of participants in the conference room.

The live transmission was also prepared on the RNG web page to be available for the colleagues who couldn't attend the course fulltime and the environment didn't allow them to enter in the virtual conference.

The course as well as the expertise of the invited speakers was highly appreciated.

Having in view the opinion of both participants and speakers the 3-days course on “Resampling methods (with R)” could be considered a success story.
